Uniform Mitigation Verification Inspection Form

Maintain a copy of this form and any documentation provided with the insurance policy

		TOTTIL GIRG GILY GC	camenation pro	ovided with the m	barance poncy			
Inspection Date: 3/07/2024 Owner Information								
Owner Name: East Lake	e Woodlands Wood	Contact Person	Contact Person: Beverly					
Address: 385/395/405/415/425/435/445 Woods Landing Trail					Home Phone:			
City: Oldsmar		Zip: 34677		Work Phone:				
County: Pinellas		1	1011	Cell Phone:				
Insurance Company:	<u>L</u>			Policy #:				
1 ,	(Vears)	# of Stories: Two		,	ocker@ameritechmail.com			
Year of Home: 1984 (40 years) # of Stories: Two Email: bneubecker@ameritechmail.com NOTE: Any documentation used in validating the compliance or existence of each construction or mitigation attribute must								
accompany this form. A though 7. The insurer m	t least one photogra	aph must accompai	ny this form to val	idate each attribute	marked in questions 3			
 Building Code: Was the structure built in compliance with the Florida Building Code (FBC 2001 or later) OR for homes located in the HVHZ (Miami-Dade or Broward counties), South Florida Building Code (SFBC-94)? A. Built in compliance with the FBC: Year Built For homes built in 2002/2003 provide a permit application with 								
a date after 3/1/20	02: Building Permit	Application Date (MI	M/DD/YYYY)					
				For homes bu ication Date (MM/DD/YY	nilt in 1994, 1995, and 1996			
		irements of Answer			/			
 Roof Covering: Select all roof covering types in use. Provide the permit application date OR FBC/MDC Product Approval number OR Year of Original Installation/Replacement OR indicate that no information was available to verify compliance for each roof covering identified. 								
2.1 Roof Covering Type:	Permit Ap _l Dat		FBC or MDC Product Approval #	Year of Original Installat Replacement	No Information ion or Provided for Compliance			
1. Asphalt/Fiberglass S	hingle 2/14/2	2014						
2. Concrete/Clay Tile								
3. Metal								
4. Built Up								
5. Membrane					_			
6. Other					_			
6. Other					_ ⊔			
	A. All roof coverings listed above meet the FBC with a FBC or Miami-Dade Product Approval listing current at time of installation OR have a roofing permit application date on or after 3/1/02 OR the roof is original and built in 2004 or later.							
	B. All roof coverings have a Miami-Dade Product Approval listing current at time of installation OR (for the HVHZ only) a roofing permit application after 9/1/1994 and before 3/1/2002 OR the roof is original and built in 1997 or later.							
C. One or more ro	of coverings do not	meet the requiremen	ts of Answer "A" o	or "B".				
D. No roof covering	ngs meet the require	ments of Answer "A	" or "B".					
3. Roof Deck Attachmen	nt: What is the weak	kes t form of roof dec	k attachment?					
A. Plywood/Orien by staples or 6d n shinglesOR- An	A. Plywood/Oriented strand board (OSB) roof sheathing attached to the roof truss/rafter (spaced a maximum of 24" inches o.c.) by staples or 6d nails spaced at 6" along the edge and 12" in the fieldOR- Batten decking supporting wood shakes or wood shinglesOR- Any system of screws, nails, adhesives, other deck fastening system or truss/rafter spacing that has an equivalent mean uplift less than that required for Options B or C below.							
24"inches o.c.) by other deck fasteni maximum of 12 in	B. Plywood/OSB roof sheathing with a minimum thickness of 7/16"inch attached to the roof truss/rafter (spaced a maximum of 24"inches o.c.) by 8d common nails spaced a maximum of 12" inches in the fieldOR- Any system of screws, nails, adhesives, other deck fastening system or truss/rafter spacing that is shown to have an equivalent or greater resistance 8d nails spaced a maximum of 12 inches in the field or has a mean uplift resistance of at least 103 psf.							
24"inches o.c.) by decking with a mi Any system of scr	24"inches o.c.) by 8d common nails spaced a maximum of 6" inches in the fieldOR- Dimensional lumber/Tongue & Groove decking with a minimum of 2 nails per board (or 1 nail per board if each board is equal to or less than 6 inches in width)OR-Any system of screws, nails, adhesives, other deck fastening system or truss/rafter spacing that is shown to have an equivalent

	П			d Concrete Roof Deck.
				or unidentified.
			o attic a	
4.	5 fe	et of th	ne insid	achment: What is the <u>WEAKEST</u> roof to wall connection? (Do not include attachment of hip/valley jacks within e or outside corner of the roof in determination of WEAKEST type)
	Ш	A. To	e Nails	
				Truss/rafter anchored to top plate of wall using nails driven at an angle through the truss/rafter and attached to the top plate of the wall, or
			Ш	Metal connectors that do not meet the minimal conditions or requirements of B, C, or D
	Mir	nimal (conditio	ons to qualify for categories B, C, or D. All visible metal connectors are:
			\checkmark	Secured to truss/rafter with a minimum of three (3) nails, and
			✓	Attached to the wall top plate of the wall framing, or embedded in the bond beam, with less than a ½" gap from the blocking or truss/rafter and blocked no more than 1.5" of the truss/rafter, and free of visible severe corrosion.
	✓	B. Cl		
				Metal connectors that do not wrap over the top of the truss/rafter, or
		a a:		Metal connectors with a minimum of 1 strap that wraps over the top of the truss/rafter and does not meet the nail position requirements of C or D, but is secured with a minimum of 3 nails.
	ш	C. S11	ngle Wi	Metal connectors consisting of a single strap that wraps over the top of the truss/rafter and is secured with a
	П	D D	aukla W	minimum of 2 nails on the front side and a minimum of 1 nail on the opposing side.
		D . D	ouble W	Metal Connectors consisting of 2 separate straps that are attached to the wall frame, or embedded in the bond beam, on either side of the truss/rafter where each strap wraps over the top of the truss/rafter and is secured with a minimum of 2 nails on the front side, and a minimum of 1 nail on the opposing side, or
				Metal connectors consisting of a single strap that wraps over the top of the truss/rafter, is secured to the wall on both sides, and is secured to the top plate with a minimum of three nails on each side.
			ructural her:	Anchor bolts structurally connected or reinforced concrete roof.
				or unidentified
		H. No	o attic a	ccess
5.				What is the roof shape? (Do not consider roofs of porches or carports that are attached only to the fascia or wall of over unenclosed space in the determination of roof perimeter or roof area for roof geometry classification).
		A. Hi	ip Roof	
		B. Fla	at Roof	
	✓	C. Ot	ther Roo	less than 2:12. Roof area with slope less than 2:12 sq ft; Total roof area sq ft of Any roof that does not qualify as either (A) or (B) above.
6.		A. SV sh dv B. No	WR (als eathing welling to SWR.	r Resistance (SWR): (standard underlayments or hot-mopped felts do not qualify as an SWR) of called Sealed Roof Deck) Self-adhering polymer modified-bitumen roofing underlayment applied directly to the or foam adhesive SWR barrier (not foamed-on insulation) applied as a supplemental means to protect the from water intrusion in the event of roof covering loss.

^{*}This verification form is valid for up to five (5) years provided no material changes have been made to the structure or inaccuracies found on the form.

7. **Opening Protection:** What is the **weakest** form of wind borne debris protection installed on the structure? **First**, use the table to determine the weakest form of protection for each category of opening. **Second**, (a) check one answer below (A, B, C, N, or X) based upon the lowest protection level for ALL Glazed openings **and** (b) check the protection level for all Non-Glazed openings (.1, .2, or .3) as applicable.

Opening Protection Level Chart Place an "X" in each row to identify all forms of protection in use for each opening type. Check only one answer below (A thru X), based on the weakest form of protection (lowest row) for any of the Glazed openings and indicate the weakest form of protection (lowest row) for Non-Glazed openings.			Glazed Openings				Non-Glazed Openings	
			Garage Doors	Skylights	Glass Block	Entry Doors	Garage Doors	
N/A	Not Applicable- there are no openings of this type on the structure							
Α	Verified cyclic pressure & large missile (9-lb for windows doors/4.5 lb for skylights)							
В	Verified cyclic pressure & large missile (4-8 lb for windows doors/2 lb for skylights)							
С	Verified plywood/OSB meeting Table 1609.1.2 of the FBC 2007							
D	Verified Non-Glazed Entry or Garage doors indicating compliance with ASTM E 330, ANSI/DASMA 108, or PA/TAS 202 for wind pressure resistance							
N	Opening Protection products that appear to be A or B but are not verified							
IN	Other protective coverings that cannot be identified as A, B, or C							
Х	No Windborne Debris Protection	X						
a sy	Exterior Openings Cyclic Pressure and 9-lb Large Missile (4.5 lb minimum, with impact resistant coverings or products listed as wind by stem of the State of Florida or Miami-Dade County and meet the required Large Missile Impact" (Level A in the table above).	orne debri	s protecti	on devices	in the p	product a	approval	
 Miami-Dade County PA 201, 202, and 203 								
 Florida Building Code Testing Application Standard (TAS) 201, 202, and 203

	Southern Standards Tachnical Degument (SSTD) 12							

- Southern Standards Technical Document (SSTD) 12
- For Skylights Only: ASTM E 1886 and ASTM E 1996

Inspectors Initials TN Property Address 385/395/405/415/425/435/445 Woods Lance

A.1 All Non-Glazed openings classified as A in the table above, or no Non-Glazed openings exist

• For Garage Doors Only: ANSI/DASMA 115

A.2 One or More Non-Glazed openings classified as Level D in the table above, and no Non-Glazed openings classified as Level B, C, N, or X in the table above
A.3 One or More Non-Glazed Openings is classified as Level B, C, N, or X in the table above
B. Exterior Opening Protection- Cyclic Pressure and 4 to 8-lb Large Missile (2-4.5 lb for skylights only) All Glazed openings are protected, at a minimum, with impact resistant coverings or products listed as windborne debris protection devices in the product approval system of the State of Florida or Miami-Dade County and meet the requirements of one of the following for "Cyclic Pressure and Large Missile Impact" (Level B in the table above):
● ASTM E 1886 <u>and</u> ASTM E 1996 (Large Missile – 4.5 lb.)
● SSTD 12 (Large Missile – 4 lb. to 8 lb.)
• For Skylights Only: ASTM E 1886 <u>and</u> ASTM E 1996 (Large Missile - 2 to 4.5 lb.)
B.1 All Non-Glazed openings classified as A or B in the table above, or no Non-Glazed openings exist
B.2 One or More Non-Glazed openings classified as Level D in the table above, and no Non-Glazed openings classified as Level C, N, or X in the table above
B.3 One or More Non-Glazed openings is classified as Level C, N, or X in the table above
<u>C. Exterior Opening Protection- Wood Structural Panels meeting FBC 2007</u> All Glazed openings are covered with plywood/OSB meeting the requirements of Table 1609.1.2 of the FBC 2007 (Level C in the table above).
C.1 All Non-Glazed openings classified as A, B, or C in the table above, or no Non-Glazed openings exist
C.2 One or More Non-Glazed openings classified as Level D in the table above, and no Non-Glazed openings classified as Level N or X in the table above
C.3 One or More Non-Glazed openings is classified as Level N or X in the table above

^{*}This verification form is valid for up to five (5) years provided no material changes have been made to the structure or inaccuracies found on the form.
